New Probill Version 2.5 & Support Renewal

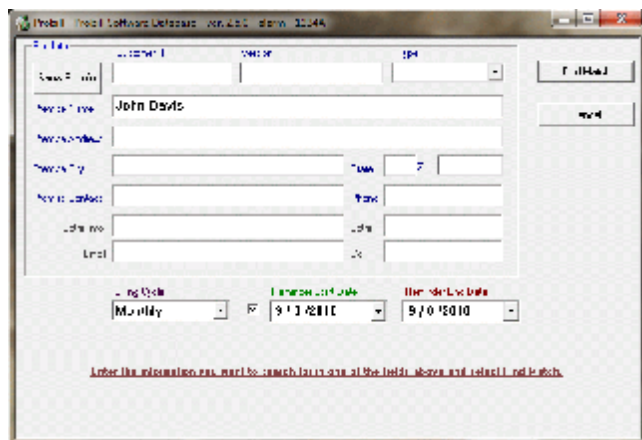

September 2010

Probill 2.50 offers many new features designed to make your life even easier! It includes a newly redesigned search engine, more advanced printing functions, credit card processing enhancements, and more...

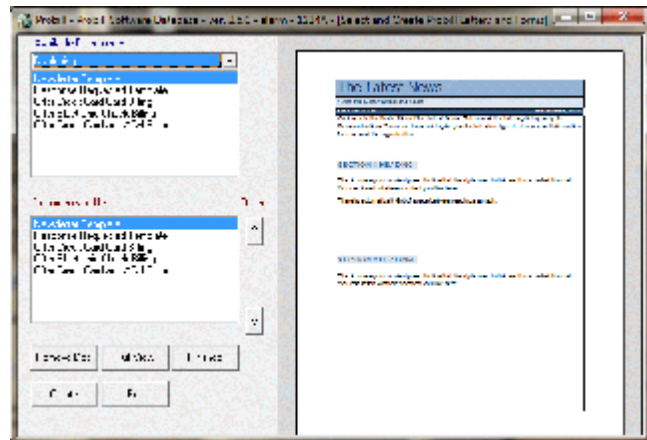

This latest Probill version has a new Advanced Account Search feature that will now allow you to find groups of accounts based on multiple search fields including account type, billing cycle, and reminder dates. This allows you to instantly email, print letters, or produce mailing labels to just the customers you need to contact.

If you process credit cards you will love Probill's ability to automatically fix expired credit cards for you at the touch of a button.

In addition we have added a new export feature you can use to export your data to an Excel spreadsheet. An improved Reminder utility, and redesigned Remote Support capabilities.

Advanced Account Search Options

Duplexing for Documents & Newsletters!

Probill 2.50 also offers many enhancements to our very popular Mail Processing Service. You can now attach a customizable newsletter or other document to your billing that we will print on the back of all of your bills allowing you to notify customers of important news or special offers.

Effective January 1st 2011 the Post Office is requiring a new Intelligent Mail Barcode to all Mail Processing to improve efficiency making this update critical if you use our Mail Processing Service.

Probill 2.5 has many other new features that have been listed on the back of this page. In addition purchasing this upgrade renews your unlimited toll free technical support for another full year and entitles you to free online updates when available. Thank You for your valuable support, we at Probill wish you much success.

As a currently registered user of Probill 2.4 your business qualifies for upgrade pricing.

Here's just some of what's new in Probill 2.5

- **Duplexing Feature when Printing:** Our new duplexing feature allows you to create newsletters and documents and have Probill automatically print them on the back of your recurring billing using your duplex compatible printer. New duplexing document templates have been added to Probill to allow you to advertise products and services to your customers when printing billing.
- **Duplexing for Mail Processing:** Attach a document to your Mail Processing upload that we will print on the back of all of your recurring bills for an additional charge of only eight cents a piece.
- **Advanced Account Search:** Completely redesigned search engine allows you to find accounts based on multiple search fields including account type, billing cycle, and reminder dates. Perform combination searches and select groups of customers to email, print letters, or mailing labels.
- **Adjustable Find Defaults:** There is a new option in the Program Setup screen that allows you to change the default Find field from the Customer Number field to the Customer Name field.
- **Ability to Print Multiple Page Documents:** You now have the ability to create and print multi page documents with our Advanced Document Editor.
- **Print Report Detail:** You can now print both a Reports Summary page as well as any Reports Detail view.
- **IMBC added for Mail Processing Service:** Effective January 1st 2011 the Post Office is requiring that all Mail sent using our very popular Mail Processing Service use a new Intelligent Mail Barcoding System to speed delivery. If you use our Mail Processing Service this update must be installed before January 1st 2011 to comply with new Postal regulations.
- **Auto Fix Credit Card Expiration Dates:** When running credit cards in Probill if you have a card that comes back expired you can click the new "Fix Expired" button and Probill will automatically attempt to update the customers credit card expiration date with our server eliminating the need to call the customer to get the new expiration date.
- **Enhanced Reminder Function:** Improved Reminder feature now shows the date a Reminder will become active as well as changing it's color caption when the Reminder is active. You can also search and print documents for active reminders.
- **Database Compression:** New Database Compression engine. Probill automatically rebuilds and compresses your database on update reducing your database size and speeding up program execution.
- **New Export Utility:** Under the Reports menu option there is a new Export option that allows you to export all or selected parts of your customer data to an Excel Spreadsheet format.
- **All New Remote Support Utility:** Allows us to remotely diagnose and repair any problems that you might experience with to program. This utility is now fully compatible with Windows Seven and allows multiple remote diagnostic sessions.
- **Integrated Support Renewal:** Automatic support renewal system entitling you to access our automatic update server.
- **New Update Utility:** Redesigned Update Utility allows us to seamlessly distribute program updates and enhancements to Probill through our automatic program update utility.
- **Program Enhancements:** Contains many other small program enhancements requested by our users..
- **Bug Fixes:** Contains many, many, small bug fixes that we have issued over the last year since the initial release of Probill 2.45.
- **Easy Upgrade:** Simply insert the new Probill 2.5 CD and the program is automatically upgraded. No data to re-enter!
- **Renews Your Support:** Purchasing version 2.5 automatically renews your Toll Free Technical Support for another year. We will no longer be offering support for Probill 2.4 so updating is critical.
